

# i-Venture

## About the Module

This module helps students make the most of their adventure sessions by enabling them to create a multimedia record of their visit. During adventure sessions students will capture the action using digital cameras. Students then download the images and plan and produce a multimedia presentation.

Students will add text to their photos and compose a Dance EJay sound track to go with them. These elements will be combined to create presentations, the best of which may be published on the internet.

Students will review and refine their presentations at various stages of production. They will engage in the editing process in order to improve the content and structure and tailor the presentation to the audience, ensuring clear communication and high entertainment value.

## Key Vocabulary

Presentation, multimedia, planning, storyboard, constructive criticism, refine, digital camera, footage, record, capture, download, edit, import, cropping, transitions, titles, text, credits, preview, review, visual effect, sound effect, background, thumbnails.

## Desired Learning Outcomes

During this module students will learn to:

- Plan a presentation;
- Collect appropriate resources;
- Use a digital camera to capture and download images;
- Manipulate images to prepare for use;
- Construct a multimedia presentation;
- Insert text and images;
- Format text appropriately for a specific purpose and audience;
- Select and create backgrounds;
- Add sound effects, animation and transitions;
- Consider the audience when selecting material to include;
- Reorder slides within a presentation;
- Collaborate and adopt a systematic approach to complex tasks;
- Evaluate and improve their presentations.
